I.	INTRODUCTION		
	The following information provides instructions to attach panels to the bottom sides of a standard VW van.		
II.	TOOLS REQUIRED		
	Cutter	Hex wrench set	
III.	INSTALLATION		

- A. CUT AND INSTALL WEATHER STRIPPING ON BOTH SIDES OF THE LIFT ENCLOSURE **FIGURE** [1].
- B. STANDARD VAN:
 - 1. Using the supplied PVC Standoffs and screws, install the driver side panel Figure [2].
 - 2. Align and Install the passenger door panel Figure [3].
 - 3. Wipe clean surface and apply adhesive tape to molding under the sliding door.
 - 4. Install sliding door panel from inside the vehicle Figure [4].
 - 5. Install and adjust weatherstripping bracket on the sliding door panel to completely seal the lift **Figure [5]**.

NOTE: Installation of these panels disables the use of factory jacks. Any bottle jack with a minimum capacity of 2 tons and a raising capability of 9 inches will perform the properties of the original jack. Ricon Corporation has made it possible to order such a jack; please contact our sales department for more information.
